## **Excavation Permit Guide Sheet**

### **All excavations within the City of Valley Park Right of Ways**

1. All excavations must be backfilled with 1 & ½” minus quarry aggregate.
2. Road running surface must be restored to pre-excavation condition unless otherwise called out in permit
3. Performance bond reviewed and approved by the City Attorney to be posted to compensate the amount of expense incurred to restore excavated area to pre-excavated conditions, if follow up final inspection deems workmanship of poor quality.
4. All excavation in roadway must be backfilled or steel plate at the end of each work day.
5. Inspections:
  - a. Backfill: At the time backfill is in place and before concrete or asphalt is in place.
  - b. Final: When job is completed to insure proper restoration.
6. 24 hour notice of excavation site to insure adequate police protection and barricade procedures.
